Office Action Summary	Application No. 10/674,698	Applicant(s) PALMERE ET AL.	
	Examiner Carlos A. Azpuru	Art Unit 1615	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Receipt is acknowledged of the preliminary amendment and information disclosure statement filed 09/30/2003.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 100-119 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-27 of U.S. Patent No. 5,104,664 (US'664). Although the conflicting claims are not identical, they are not patentably distinct from each other because US'664 claims a composition for treating trees with products having enhanced penetration and stability comprising at least one short chain polyalkylene glycol having a molecular weight of between about 200 and 400, at least one short chain alkylene glycol, a glycol soluble boron containing compound in an amount effective to prevent or eradicate infestation. Polyethylene glycol is claimed in

claim 1. Ethylene glycol is also set out in claim 1. propylene glycol would fall under the category of "short chain alkylene" and would also be an obvious variant for the ordinary practitioner. The amounts of each component are within the limits of the instant claims. Claim 5 of US'664 adds water. Viscosity of the composition would be an inherent property of the mixed composition and those of ordinary skill would know to vary it in order to allow application to the diseased trees. Those of ordinary skill would have expected similar therapeutic results from the instant composition given the claims of US'664. The instant application would have been obvious given the claims of US'664.

Bechgaard is cited for its composition which includes a boron compound in an ethylene glycol compound. Polyalkylene glycol is neither disclosed nor suggested for use in combination with the ethylene glycol/boron compound.
